

Club Custom Events

Club custom events are a mechanism to allow your members to record match results in SkyCourt for event types that SkyCourt does not yet support. A great example of this is an end of season club championship tournament. Eventually SkyCourt will provide full support for a club championship tournament, but for now, Club Custom Events will allow your members to record those club championship matches in SkyCourt. By entering the matches in SkyCourt, they can have their SkyCourt ratings reflect the results of the club championships.

Also, as you will see below, this will also allow you to more easily see which matches have been played for the event, through the event report.

Using a custom event

By defining a custom event (see below), you allow matches to be recorded against the event. This has two benefits:

- Players can have their ratings reflect the outcome of matches that are not part of SkyCourt
- Player's history of matches will be able to show the reason that two players played their match (i.e., it was for the club championship of 2019)

Recording a match against a custom event starts on the player home page

The screenshot shows the SkyCourt Fitness interface. At the top, there is a navigation bar with the SkyCourt Fitness logo and links for Player, Rankings, Leagues & Ladders, Courts, Club Admin, and a dropdown menu for Brock Lee. The main content area is divided into two columns. The left column contains a 'Up Next' section with 'No upcoming bookings', a 'Your rating and club ranking' section showing a rating of 4.596, W8, and 1/30, and three buttons: 'Record Match Results', 'Find a member', and 'Squash Courts'. The right column is titled 'Box League #1' and shows a 'Group A' table with columns for 'League Player', 'Brock vs Opponent', 'Points', and 'Session Record'. The table lists six players: Brock Lee, Paul Molive, Terry Aki, Mario Speedwagon, Anna Mull, and Cliff Hanger, all with 0 points and 0-0 session records. At the bottom of the table, there are links for 'Record Score', 'View Standings', 'Step Out', and 'MANAGE'.

League Player	Brock vs Opponent	Points	Session Record
Brock Lee	---	0	0-0
Paul Molive	?-?	0	0-0
Terry Aki	?-?	0	0-0
Mario Speedwagon	?-?	0	0-0
Anna Mull	?-?	0	0-0
Cliff Hanger	?-?	0	0-0

Click on the Record Match Results button on the left. Doing so brings up the generic Record Match Results dialog. When no custom events are defined, the “type of match” drop down list includes “Friendly match”, “Competitive match” and all the box leagues that the player belongs to. If there are custom events defined, they will show up at the bottom of the list:

Record your score

Select the type of match... 

Select the type of match...

Friendly match

Competitive match

Box League #1

Wednesday Houseleague

2019 Club Champs

Squash

Best of 5

Click on the match result

I won

I Lost

Date Played 

Cancel

Notice that the bottom of the list is a 2019 Club Champs option. Selecting that as the match type and filling in the rest of the information allows players to record scores against that event.

Once a match has been recorded against that event, the match will show up on the player’s statistics page tagged with that event

Defining the custom event

The first step to using Club Custom Events is to define a new event. This can be done on the Club Admin page. You will notice there is a tile called “Custom Events”

SquashDemoCo #1

<p>Settings</p>	<p>Members</p> <p>32 Members</p>	<p>Leagues</p> <p>24 players in 3 leagues</p>
<p>Custom Events</p> <p>1 active events</p>	<p>Advertising</p> <p>Not Licensed</p>	<p>Member Communication</p> <p>0 active announcements</p>
<p>Club Ratings</p>	<p>Courts</p> <p>4 courts in 1 group</p>	<p>Court Reservation Schedules</p> <p>2 schedules defined</p>

This tile also tells you how many custom events you have currently defined. In the illustration above, there is one active event defined. Clicking on the tile takes you to the page where you can manage those custom events.

Custom Events

In SkyCourt an event is an object that is attached to each match score that is recorded. When a league is created, an event for that league is also created and then all match results recorded for that league are associated with the league's event.

Here you can create custom events so that your players can record scores associated with those events. An example might be a club championship event. You can create that event here, and then have your member's record their club championship match results against that club championship event. This allows your members to record matches that affect their rating and that are differentiated from other matches (because they are associated with the club championship event). You can then click on the report icon to see the list of matches that have been recorded against that event.

Current Events [Add a new custom event](#)

Name	Start Date	End Date	
2019 Club Champs	Feb 18, 2019	Mar 25, 2019	

Here you see the current event called “2019 Club Champs”. It has a start date of Feb 18, 2019 and an end date of Mar 25, 2019. Custom events can exist forever (they have no start date and no end date), or they can be limited to a specific period of time. In this case, the club administrator has decided to create the event to coincide with the running of the club champs. There is no point letting the players enter club champs results after the club champs event has ended. When you create a Club Custom Event, you specify the name of the event, the start date of the event and if the event runs indefinitely or until a specific date.

Player Rankings Leagues & Ladders Courts Club Admin

Create a custom event

Name

Scores can be recorded against this event as of:

Mon February 25

Scores can be recorded against this event:

indefinitely

until...

Cancel Save

This allows you to create an event ahead of time, yet it won't be visible in the UI until the start date.

On the Custom Events page, you can potentially see three lists of events.

- Current Events
 - These are events that are active as of today
- Future Events
 - These are events that will become active in the future
- Old Events
 - These are events that were active in the past but are no longer selectable in the Record Score dialog

Here is what the page looks like when all three event types are present:

Custom Events

In SkyCourt an event is an object that is attached to each match score that is recorded. When a league is created, an event for that league is also created and then all match results recorded for that league are associated with the league's event.

Here you can create custom events so that your players can record scores associated with those events. An example might be a club championship event. You can create that event here, and then have your member's record their club championship match results against that club championship event. This allows your members to record matches that affect their rating and that are differentiated from other matches (because they are associated with the club championship event). You can then click on the report icon to see the list of matches that have been recorded against that event.

Current Events [Add a new custom event](#)

Name	Start Date	End Date	
2019 Club Champs	Feb 18, 2019	Mar 25, 2019	

Future Events

Name	Start Date	End Date	
Sunday March Round Robins	Mar 3, 2019	Mar 31, 2019	

Old Events

Name	Start Date	End Date	
2018 Club Champs	Feb 5, 2018	May 1, 2018	

If you make edits to an event, that event might move from one list to another, depending on the changes you make to the dates. When you save an event, the event's row in the table will go fade to green and back to help you see which table the event is now in.

If you click on the pencil icon, you can edit the event.

If you click on the graph icon, you can view the report of all the matches recorded against that event.

Reporting

As mentioned in the previous section, clicking on the graph icon next to an event brings up the report for that event. The report shows you all the matches that have been played, sorted by date. The report is similar to the Match Results tab of the player's statistics page.

The screenshot shows the SKY COURT FITNESS interface for player Brock Lee. The page includes navigation tabs for Player, Rankings, Leagues & Ladders, Courts, and Club Admin. The player's name, Brock Lee, is displayed at the top right. Below the name, there is a dropdown menu for the sport (Squash) and a rating of 4.596. To the right, it shows a ranking of 1/30 and a status of Unspecified Handed. There is also an 'Add a note' button with an envelope icon. Below this, there are two tabs: 'Player statistics' and 'Match results', with 'Match results' being the active tab. A dropdown menu for '20 Matches' is visible. The main content is a table of match results.

Date	Winner	Loser	Score	Rating (Brock)	Opponent Rating	Adjustment	Event
2019-02-25	Brock Lee	Greta Life	3-1	4.594	4.174	0.002	2019 Club Champs
2019-02-25	Brock Lee	Greta Life	3-2	4.612	4.156	-0.018	Competitive match
2019-02-25	Brock Lee	Greta Life	3-0	4.589	4.179	0.023	Competitive match
2018-12-30	Brock Lee	Mario Speedwagon	3-2	4.593	4.397	-0.004	Wednesday Houseleague
2018-12-29	Brock Lee	Petey Cruiser	3-1	4.594	4.036	-0.001	Wednesday Houseleague
2018-12-28	Brock Lee	Anna Mull	3-0	4.558	4.428	0.036	Wednesday Houseleague
2018-12-09	Brock Lee	Anna Mull	3-2	4.560	4.351	-0.002	Wednesday Houseleague

The report shows the matches played sorted by date, who played, who won and lost, the score, and the rating information for those players.

You can use this report to track the progress of the event. It also has a dialog that allows you to enter a match against the event between two arbitrary members of your club.

That's it. The feature is available for use by any club at any time. As of Feb 25, 2019, the reporting feature has not yet been completed and released.
